

NEUTRA

NEUTRALIZING PASTE

DESCRIPTION

The **Soudotec neutralizing paste** is a white, creamy and alkaline paste that contains no toxic components. This product neutralizes and eliminates the effect of residual acids produced by **Soudotec pickling paste**. Neutralization of acids is essential from an environmental point of view.

The **Soudotec neutralizing paste** converts the acid into lime nitrate and calcium fluoride, both of which are environmentally safe.

CHARACTERISTICS

- **Neutralizes the strong acids produced by the Soudotec pickling paste for stainless steels**
- Precipitates the dissolved metallic compounds
- Contains no dangerous ingredients
- Low alkalinity

PROCEDURE

The **Soudotec neutralizing paste** is applied over the pickling paste after the latter has had enough time to react sufficiently.

- 1- Apply the **Soudotec neutralizing paste** over the stripping paste with a brush ;
- 2- Neutralization is complete as soon as the bubbles stop forming ;
- 3- Clean the part thoroughly at high pression using cold water ;
- 4- The neutralization residues may now be disposed of without any danger to the environment.

Efficiency: 1 kg enables the treatment of 80 to 150 meters of welding beads.
